✦ The Vision

SpendWise is not just another budgeting app. It is a meticulously crafted Progressive Web Application (PWA) designed to bring a high-end, luxury editorial aesthetic to personal finance for college students.

By combining minimalist typography, soft glassmorphism, and dynamic micro-interactions, SpendWise makes tracking your daily expenses feel like flipping through a premium lifestyle magazine.

✨ Signature Features

Editorial Aesthetic

- **Tailored Layouts:** Beautifully crafted color palettes paired with elegant typography.
- **Glassmorphic UI:** Soft blur panels, advanced frosted glass, and ultra-soft drop shadows.
- **Micro-Animations:** Smooth, responsive hover states and scale transitions for every interaction.

Lightning Fast Logging

- **Frictionless:** Add expenses in under 3 seconds with optimized numeric keypads.
 - **One-Tap Chips:** Select categories effortlessly using quick-action chips.
 - **Bottom Sheet:** Seamlessly integrates directly into the global app drawer.
-

Real-time Cloud Sync

- **Cross-Device:** Powered by Firebase Firestore, your expenses synchronize instantly across all devices.

Smart Budgeting & Analytics

- **Budget Tracking:** Set a monthly allowance and watch your remaining balance recalculate instantly.

- **Offline First:** Full offline persistence. Log expenses on the subway, and they'll silently sync when you're back online.
- **Category Insights:** Stunning visualizations to see exactly where your money goes.
- **Smart Alerts:** In-app notifications when you exceed 85% of your total or category budget.

Premium UX Upgrades

-  **Dynamic Theming Engine:** A robust 9-theme structural matrix that instantly adapts global color palettes, spacing, and curated Google typography combinations.
-  **Advanced Glassmorphism UI:** Fully interactive, Framer Motion powered dropdown menus and modals that seamlessly blur and blend into the active theme.
-  **Real-Time Ledger Search:** Lightning fast client-side filtering by description, category, or amount on the Expenses page.
-  **Endless Scroll Transactions:** Seamlessly load previous months of transaction data directly into your feed with a single click.
-  **Smart Visibility:** The monthly budget setup card elegantly collapses into a minimalist summary strip once configured, automatically expanding on the 1st of every new month.
-  **Data Portability:** Instantly generate and export your complete transaction history to a CSV file.

Dynamic Theming Engine

SpendWise features a state-of-the-art structural matrix that dynamically swaps CSS variables, fonts, and layout spacing at runtime.

Available Themes

1. **Cyberpunk** (Neon Purples, Tech Fonts)
2. **Sahara** (Warm Peach, Elegant Serifs)

- 3. **Minimal** (High-Contrast Black & White, Swiss Sans)
- 4. **Ocean** (Deep Blues, Fluid Curves)
- 5. **Forest** (Earthy Greens, Organic Spacing)
- 6. **Neobrutalism** (Harsh Shadows, Bold Typography)
- 7. **Midnight** (OLED Black, Sleek UI)
- 8. **Sunset** (Warm Gradients, Soft Fonts)
- 9. **Corporate** (Clean, Professional Blues)

System Architecture

SpendWise utilizes a **"Thick Client + Smart Database"** architecture pattern, completely eliminating the need for a custom backend server to reduce latency and infrastructure overhead.

Technology	Purpose
Next.js 14	App Router, Server-Side Rendering (SSR), API Routes, and optimized static delivery.
Zustand	Global client-state management (caching Firebase data to avoid redundant reads).
Tailwind CSS	Utility-first styling enabling our dynamic CSS variable injection.
Framer Motion	Complex, physics-based micro-animations and layout transitions.
Firebase	Firestore (NoSQL Database), Auth (Google OAuth), and Hosting.
Recharts	Rendering responsive, beautiful data visualizations on the Analytics page.

Project Structure

```
src/  
├─ app/                # Next.js App Router Pages  
│   ├── (app)/         # Authenticated Routes (Dashboard, Analytics, Settings)  
│   └── (auth)/        # Public Routes (Login)  
├─ components/        # React Components  
│   └── features/      # Domain-specific components (e.g., Budget, Expenses)
```

	layout/	# Structural components (Sidebar, TopNav)
	└─ shared/	# Reusable generic components (ThemeSelector)
	└─ ui/	# Base UI components (Buttons, Inputs, Modals)
└─	config/	# App configuration (Constants, Categories, Themes)
└─	hooks/	# Custom React hooks (useClickOutside, useAuthGuard)
└─	lib/	# Utility functions and external integrations (Firebase)
└─	store/	# Zustand global state slices
└─	types/	# TypeScript interfaces

Local Development

Want to run this premium experience on your local machine? Follow these steps:

1. Prerequisites

- **Node.js:** v18.17.0 or higher
- **Firebase CLI:** Installed globally (`npm i -g firebase-tools`)
- **Java:** Required for running the local Firebase Emulator Suite

2. Installation

Clone the repository from GitHub:

```
git clone https://github.com/AdityaPatil2549/Spand-wise.git
cd Spand-wise
npm install
```

3. Environment Configuration

Create a `.env.local` file in the root directory based on the `.env.example`:

```
NEXT_PUBLIC_FIREBASE_API_KEY=your_api_key
NEXT_PUBLIC_FIREBASE_AUTH_DOMAIN=your_project.firebaseio.com
NEXT_PUBLIC_FIREBASE_PROJECT_ID=your_project
NEXT_PUBLIC_FIREBASE_STORAGE_BUCKET=your_project.appspot.com
NEXT_PUBLIC_FIREBASE_MESSAGING_SENDER_ID=your_sender_id
NEXT_PUBLIC_FIREBASE_APP_ID=your_app_id
```

4. Running the Development Server

```
# Terminal 1: Start the Next.js development server
npm run dev

# Terminal 2: Start the Firebase Emulator Suite (Firestore & Auth)
npm run emulators
```

Open <http://localhost:3000> to view the application in all its glory.

Contributing

Contributions are welcome! Whether it's adding new features, improving the UI/UX, or fixing bugs, we appreciate your help in making SpendWise the most beautiful expense tracker available.

1. **Fork** the Project
 2. **Create** your Feature Branch (`git checkout -b feature/AmazingFeature`)
 3. **Commit** your Changes (`git commit -m 'Add some AmazingFeature'`)
 4. **Push** to the Branch (`git push origin feature/AmazingFeature`)
 5. **Open** a Pull Request
